

AI Agents as Interviewers

A new way of building specs

Emanuele Fabbiani

- 01 The problem
- 02 Case study: support-desk app
- 03 Four levels of interviewing

Bernie

**I am once again asking
How to I write good specs?**

/interview-with-memory

ADRS), so the first decision is which branch to establish before any planning or coding.

Questions

Which branch of repo memory should we clarify first?

- ☐ A Product scope: who this app serves and what it must do (Recommended)
- ☐ B Domain language: define key terms for psychological support
- ☐ C Technical direction: architecture, integrations, and constraints
- ☐ D Agent operating rules: how future agents should work in this repo
- ☐ E Other...

Take-home messages

01

Specs beat speed

Faster code generation means nothing if you build the wrong thing faster.

02

Let the agent interview you

The best questions come from the agent; the best answers still come from you.

03

Turn answers into memory

Persist decisions in AGENTS.md, product.md, glossary.md and ADRs so they outlive the chat.

ABOUT ME

Emanuele Fabbiani

Head of AI @ xstream

Founder at xstream and Reaidy (both acquired by TeamSystem in 2025).

Professor in AI at the Catholic University of Milan; guest lecturer at PoliMI, EPFL and Politechnika Wrocławska.

PhD in Applied AI, with 9 peer-reviewed papers and 170+ citations.

Speaker at 40+ international conferences — AMLD Lausanne, PyData Berlin, Paris and Milan, Swiss Python Summit, Codemotion.

We're hiring!
